

BENCHMARK PROJECT MANAGEMENT (UK) LTD – CASE STUDY

Title

Garage Area Improvement Works

General Scope:

Remove the existing garages and its contents from site. Implement drainage. Install new timber fencing to boundary. Install solar street lighting. Relay new surface macadam to entire area and implement a drainage solution. Line mark for optimal car parking bays.

Work included:

- Assessment of waste within garage contents and dispose of responsibly
- Replace existing timber fencing on boundary with concrete posts and close board
- Install 3no. solar LED street light columns
- Line mark for car parking bays using thermoplastic
- Demolition works of garage structures, sort and send for recycling
- Create falls in car park to force rainwater into a newly installed granular drainage system
- Lay fresh surface course of macadam to entire site
- Delegating with local residents to help minimise disruption for all parties

Dates:

Feb -March 2018

Client:

MD Group on behalf of GCH

Value:

£70,000.00

Innovation:

- The run-down garage area was attracting fly-tipping, antisocial behaviour and vermin. Our clients decided that the best solution for the local area would be to benefit from off street parking whilst subsequently improving the visual aspect behind their homes.

Customer Satisfaction:

“Better than I could have imagined, friendly team who deliver astounding work.”

Gloucester City Homes
